Professional Summary

Fourth-year B.Tech Computer Science student and fresher with a 17-month full-stack internship. Built and shipped six web products using React, Next.js, Node.js, Python, databases, and cloud platforms. Comfortable owning features from interface and API design through testing and deployment.

Internship Experience

Full Stack Developer Intern

December 2023 – May 2025

Tedforge Solutions Private Limited

India

- Developed responsive React and Angular features and connected them to Node.js and Express.js REST APIs during a 17-month internship.
- Improved MySQL and MongoDB access on data-heavy screens by removing redundant reads and unnecessary request round trips.
- Reproduced recurring defects, delivered fixes through code review, and worked in an Agile development process.

Projects

GhostRelay – Privacy-First Email Aliasing Platform | *Next.js, React 19, Cloudflare Workers, D1, Resend*

- Built disposable email aliases that route messages without exposing a user's primary inbox; added per-alias controls for disabling spam sources.
- Shipped the frontend, edge API, D1 persistence, and email delivery as one production system at ghostrelay.me.

Quizify – AI-Powered Assessment Platform | *Next.js, Supabase, Redis, Google Gemini, RAG*

- Built quiz creation, classroom sharing, explanations, and mastery tracking with a Next.js interface and PostgreSQL-backed data layer.
- Kept model calls server-side, grounded generation in uploaded documents, validated structured outputs, and cached repeat requests.

DareStake – Accountability PWA | *Next.js, TypeScript, Firestore, PWA, Vitest*

- Built an installable challenge app with deadline tracking, timezone-safe resolution, and transactional Firestore penalty claims.
- Added automated tests around the money-sensitive claim flow so the same missed commitment cannot be charged twice.

Education

Bachelor of Technology in Computer Science and Engineering

2023 – Present

COER University, Roorkee

Fourth-Year Student

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

Technical Skills

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend: React, Next.js, Angular, Tailwind CSS, PrimeNG, Material UI

Backend and Data: Node.js, Express.js, FastAPI, REST APIs, PostgreSQL, Supabase, MySQL, MongoDB, Redis, Cloudflare D1

Cloud and Tools: Git, GitHub Actions, CI/CD, Cloudflare Workers, Vercel, Firebase, AWS

AI Integration: Google Gemini API, Retrieval-Augmented Generation, Prompt Engineering, Structured Output Validation
