

SHIVANSH GOEL

Full Stack Developer

+91 9458569110 | shivansh.goela12@gmail.com | Delhi, India | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer building production web applications end to end with React, Next.js, and Node.js on modern serverless infrastructure. Experienced designing responsive user interfaces, building REST APIs and database-backed services, and shipping features from design through deployment. Comfortable owning both the frontend experience and the backend logic, including AI and LLM integrations.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, React 19, Next.js, Angular, Tailwind CSS, PrimeNG, Minimal UI (MUI), Responsive Design

Backend and APIs: Node.js, FastAPI, REST APIs, JSON, CRUD Operations, Server-Side Rendering

Databases and Storage: Supabase, Redis, Cloudflare D1, Caching

Cloud and DevOps: Cloudflare Workers, Firebase Tools, Git, GitHub, Vercel-style Deployment

AI Integration: LLM Integration, Google Gemini, RAG, Prompt Engineering, AI Security Middleware

PROFESSIONAL EXPERIENCE

Full Stack Developer, Intern

December 2023 – May 2025

Tedforge Solutions Private Limited

India

- Across a 17-month internship, built client-facing interfaces with React and Angular and developed Node.js REST APIs, turning requirements into responsive, production-ready features end to end.
- Improved MySQL and MongoDB data paths, reducing query overhead and making product interactions more responsive and dependable.
- Improved application stability by reducing reported bugs 40 percent through systematic debugging and refactoring, collaborating through Git and GitHub.

PROJECTS

GhostRelay – Privacy-First Email Aliasing Platform [Live] [Source] | *Next.js, React 19, Cloudflare Workers, Cloudflare D1, Resend*

- Built a full stack, privacy-first email aliasing platform on Cloudflare's edge network, spanning the Next.js frontend, edge API routes, and D1 database layer.
- Implemented one-click alias creation with per-alias enable and disable controls, a responsive dashboard, and email forwarding through Resend while keeping the user's real address hidden.

Quizify – AI-Powered Assessment Platform [Live] | *Next.js, React, Supabase, Redis, Google Gemini, RAG*

- Built an AI-powered assessment platform end to end, from the Next.js frontend and quiz UI to the Supabase data layer and server-side API routes that generate topic-based quizzes on demand.
- Implemented a RAG pipeline and a server-side AI Security Middleware that proxies Gemini calls with no client-side API key, and used Redis caching to reduce latency and cost.
- Applied prompt engineering for structured, schema-consistent output and profile contexting to tailor question difficulty per learner.

FiTrack AI – Adaptive AI Fitness Platform [Live] | *Next.js, Python, Machine Learning, Supabase, Google Gemini*

- Built a full stack fitness platform that unifies workout, nutrition, and recovery signals and adaptively adjusts workout intensity, with a Next.js frontend and a Python/ML-backed service.
- Integrated Gemini through a secure server-side proxy and delivered personalized, goal-aware workout guidance from each user's history.

Ziplink – URL Shortener SaaS [Live] [Source] | *Next.js, Firebase, Edge Redirects*

- Built a full stack URL shortener SaaS that turns long URLs into trackable, brand-ready links with QR-code downloads and edge redirects for fast, global redirection.
- Implemented per-link analytics and a responsive Next.js dashboard backed by Firebase, making every shared link measurable across campaigns.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

COER University

Roorkee, India

- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

CERTIFICATIONS

Python 3.11 Programming with FastAPI Backend Framework | **TypeScript 5.2** – Microsoft

Angular 16 with TypeScript 5.2 and PrimeNG 16 | **Onsite Technical Internship – Trainee Software Developer (Full Stack)**
