

SHIVANSH GOEL

Full Stack Developer

+91 9458569110 | shivansh.goela12@gmail.com | Delhi, India | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 17 months of professional experience building client-facing web applications in React, Angular, and Node.js, backed by four self-directed products running in production. Takes features from requirement through deployment on serverless and edge platforms, including LLM-backed features integrated server-side.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React, Next.js, Angular, Tailwind CSS, PrimeNG, MUI (Material UI), Responsive Design

Backend and APIs: Node.js, FastAPI, REST APIs, Server-Side Rendering

Databases and Storage: MySQL, MongoDB, Supabase (PostgreSQL), Cloudflare D1, Redis

Cloud and DevOps: Cloudflare Workers, Vercel, Firebase, Git, GitHub

AI Integration: Google Gemini API, Retrieval-Augmented Generation (RAG), Prompt Engineering, Server-Side Model Proxying

PROFESSIONAL EXPERIENCE

Full Stack Developer, Intern

December 2023 – May 2025

Tedforge Solutions Private Limited

India

- Seventeen continuous months on a client-facing product team – long enough to carry features from requirement to release rather than observe them.
- Built responsive interfaces in React and Angular and the Node.js REST APIs behind them, owning both sides of each feature.
- Reworked MySQL and MongoDB queries on data-heavy screens to cut round trips and redundant reads, and took bug reports through reproduction and root-cause analysis rather than surface patches.

PROJECTS

GhostRelay – Privacy-First Email Aliasing Platform [Live] [Source] | *Next.js, React 19, Cloudflare Workers, Cloudflare D1, Resend*

- Built a full stack, privacy-first email aliasing platform on Cloudflare's edge network, spanning the Next.js frontend, edge API routes, and D1 database layer.
- Implemented one-click alias creation with per-alias enable and disable controls, a responsive dashboard, and email forwarding through Resend while keeping the user's real address hidden.

Quizify – AI-Powered Assessment Platform [Live] | *Next.js, React, Supabase, Redis, Google Gemini, RAG*

- Built an AI-powered assessment platform end to end, from the Next.js frontend and quiz UI to the Supabase data layer and server-side API routes that generate topic-based quizzes on demand.
- Implemented the retrieval pipeline that grounds generated questions in the user's uploaded documents, routed all Gemini calls through server-side API routes so no key reaches the browser, and cached responses in Redis to avoid paying for repeat generations.
- Constrained model output to a fixed schema through prompt design and passed learner profile data into the prompt to vary question difficulty.

FiTrack AI – Adaptive Fitness Platform [Live] | *Next.js, Python, Supabase, Google Gemini*

- Built a full stack fitness platform that unifies workout, nutrition, and recovery logs into one view and adjusts recommended training intensity as the user's history changes, with a Next.js frontend over a Python service.
- Called Gemini through a server-side route with each user's profile and recent performance as context, returning goal-aware guidance in plain language rather than raw metrics.

Ziplink – URL Shortener SaaS [Live] [Source] | *Next.js, Firebase, Edge Redirects*

- Built a full stack URL shortener SaaS that turns long URLs into trackable, brand-ready links with QR-code downloads and edge redirects for fast, global redirection.
- Implemented per-link analytics and a responsive Next.js dashboard backed by Firebase, making every shared link measurable across campaigns.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

2023

COER University

Roorkee, India

- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering.

CERTIFICATIONS

Python 3.11 Programming with FastAPI Backend Framework | **TypeScript 5.2** – Microsoft

Angular 16 with TypeScript 5.2 and PrimeNG 16 | **Onsite Technical Internship – Trainee Software Developer (Full Stack)**
