### AI Skills

#### Applied AI

Google Gemini API, RAG, prompt engineering, structured outputs

#### Retrieval

Embeddings, document chunking, semantic search, grounding

#### Languages

Python, TypeScript, JavaScript, SQL

### Engineering

#### Backend

FastAPI, Node.js, Express.js, REST APIs

#### Data

PostgreSQL, Supabase, Redis, MySQL, MongoDB

#### Frontend

React, Next.js, Angular, Tailwind CSS

#### Cloud

Cloudflare Workers, Firebase, Vercel, AWS, GitHub Actions

### Strengths

Server-side model integration

Schema-based validation

Cost-aware caching

End-to-end product delivery

### Certifications

#### TypeScript 5.2

Microsoft

#### Python 3.11 with FastAPI

Angular 16 with TypeScript and PrimeNG

### Profile

Fourth-year B.Tech Computer Science student and fresher with a 17-month full-stack internship. Built and shipped three Gemini-backed products using retrieval-augmented generation, structured output validation, server-side model calls, and caching. Seeking an AI Developer role focused on reliable product integration rather than model research claims.

### Selected AI Projects

#### Quizify – Document-Grounded Assessment Platform

LIVE

*Gemini, RAG, FastAPI, Redis, Supabase*

- Built a retrieval flow that finds relevant passages in uploaded documents before Gemini generates grounded questions.
- Kept model calls server-side, validated each question against a fixed schema, and cached repeat requests in Redis.

#### FiTrack AI – Adaptive Fitness Platform

LIVE

*Gemini, Python, Next.js, Supabase*

- Combined workout, nutrition, and recovery data into goal-aware guidance generated through server-side Gemini prompts.
- Designed the AI layer to support the product while deterministic application logic keeps user data and calculations controlled.

#### MoodRadio – Contextual Music Recommendation

LIVE

*Gemini, Next.js, YouTube Data API, Firebase*

- Interpreted free-form mood text with Gemini, then ranked candidate tracks using the listener's YouTube library and recent history.
- Built the full recommendation interface and data flow as a deployed TypeScript product.

### Internship Experience

#### Full Stack Developer Intern

Dec 2023 – May 2025

*Tedforge Solutions Private Limited*

India

- Developed React and Angular features connected to Node.js and Express.js REST APIs during a 17-month internship.
- Improved MySQL and MongoDB access, fixed recurring defects, and delivered changes through review in an Agile team.

### Education

#### B.Tech in Computer Science and Engineering

2023 – Present

*COER University, Roorkee*

Fourth-Year Student

Coursework: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering.
